

COVID-19 vaccines administered per day to Wisconsin residents

Updated: 1/19/21 (Total: 647)

Select a county or HERC region
Langlade County

Manufacturer
■ Moderna
■ Pfizer

This chart shows how many COVID-19 vaccine doses have been administered to Langlade County residents. We expect to see fewer people vaccinated in the beginning, as supplies of the vaccine will be limited. As more COVID-19 vaccine becomes available, we will see an increase in the number of individuals vaccinated each day.

The orange bars represent the number of COVID-19 vaccine doses administered that were manufactured by Pfizer. The purple bars represent the number of COVID-19 vaccine doses administered that were manufactured by Moderna. Data are shown by where an individual who was vaccinated lives and represents Langlade County residents who have received a COVID-19 vaccine. This includes some residents who have been vaccinated in another state.
